

Car Handle

What is its purpose:

A strong and supportive bar that attaches inside your car door frame

Why might it be helpful:

You can lean on it and push down in order for you to get up out of your car seat. Includes a seat belt cutter and glass breaker for emergencies.

Who would benefit from it:

People who require more support and leverage when getting out of the car.

What do I need to be able to use it:

The device should be simple to use, however some people may need prompting to use it safely.

Where can I get one?:

Either online or you can visit a local mobility shop.

How much does it cost?:

£15 - £25
