

Big Button Remote

What is its purpose:

Can combine all your remote controls into one, simple and easy to use control.

Why might it be helpful:

Favourite channels can be pre-programmed to eliminate the hassle of searching through unwanted channels. Large, tactile buttons for easy use. Extra buttons are omitted so it only features those you will actually need.

Who would benefit from it:

Anyone who struggles to use more complex remotes or needs larger buttons due to dexterity or sight impairment.

What are the potential risks:

The person may find learning to use a new control difficult. They may feel frustrated by it. They may continue to look for their old control if it seems unfamiliar.

What do I need to be able to use it:

You may require some assistance with set up to replace an existing remote, they do come with clear instructions.

Where can I get one?:

A variety of brands are available through online shopping site and some electrical stores

How much does it cost?:

£20 - £40
